I think so too. I'll copy Corine Li in Region 9 on this message.

Those "09" IDs could be Tribal water systems under Region 9 DI program if they are from the Navajo Nation.

Here is the map of the intakes and gages on the Animas and San Juan. I will work up some travel times before I leave today, but NM or USGS may already have some idea. There is an application called ICWATERS co-developed by the EPA which should give a good estimate of concentration and instream flow time, but I do not currently have access to the software. HQ might be able to help in getting this if it is needed.

I will start working from home tomorrow about 6:30 am. My Cell number is Personal Phone/Ex. 6  
Also Angel Kosfiszser will be in the Office to assist with this as well if needed.

Thanks!

Robert Kirkland
